Measure, Appointment or Topic:

HB3076

This bill is far too vague. There is nothing written to prevent overstep or provide any protection for FFL's. This is just another tax and attempt to further box out large and small FFL's from being able to operate. This is an attempt to litigate against all law abiding FFL's instead of going after the few that are not law abiding. Instead of writing more laws that are ineffective in stopping problems, use what you have already put in place. There is no way I can support litigation that is so vague and allows for tremendous over reach without checks and balances for the FFL's.
