

Submitter: Mark Puhlman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2067

Dear Committee:

Small landscapers need assistance transitioning from gas-powered landscaping equipment to electric. Gas blowers are ultimately cheaper to operate, but the initial investment may keep the landscapers from switching. Electric equipment is better for their health and the environment. The impacts on hearing, the cardiovascular and respiratory systems of our landscapers, and the general public make it vital that we eliminate these gas-powered monstrosities.

Please pass this bill.
