

Submitter: Jeff Speder

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

Committee members,

As an US citizen, I strenuously oppose HB 3075 as it is in clear violation of the inherent rights recognized and enshrined in the 2nd Amendment of the US Constitution (the supreme law of the land). The committee membership, as most Americans do, should be well aware of this direct violation and yet, because of a supermajority in the state legislature, the majority is brazen enough to ram this bill through.

To make the process for exercising one's rights is the denial of those rights. By whatever means, this denial of constitutional rights is a devious and ignores both law and legal precedent.

I would hope that the minority party, who undoubtedly have the interests of the citizens of this state more in mind than the majority party, will do whatever is in their power to oppose this bill and further to prevent its passage.

Again, I strenuously oppose HB 3075 and any attempt to pass it or anything like it.
