

Submitter: Mary Addams

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SJR28

I support an amendment to our Constitution to establish a fundamental right to a clean, safe and healthy environment. There's NO 2nd NATURE. Climate change is already wreaking havoc with the planet--flooding, droughts, more severe wildfires, hurricanes, and tornadoes. The oceans are dramatically increasing in temperature as they absorb more and more carbon dioxide. We humans are threatening every species (including ourselves) with extinction.

I have a 4 year old granddaughter. I want her to have a planet where she and all the other young ones can live in a stable environment.
