House Committee On Judiciary

Measure, Appointment or Topic:

HB3076

As a US citizen, Oregon resident, and USMC veteran, sworn to uphold and defend the constitution of the US. this disgusts me. this is a blatant and inflammatory attempt to arbitrarily restrict access to a constitutionally guaranteed right. no other right would have such restrictions. besides the above mentioned I am a Paramedic, and small business owner. I own Oregon small arms concepts. OSAC is not a large business, I do not make a lot of money and have a small clientele. but I serve people face to face and offer custom options that you can not get from a big store or a less personal dealer. that being said, this would put me out of business. I follow common sense safety standards. firearms are locked, access is restricted and surveilled, available to me to make available to others at my discretion. I follow all local, state and federal laws for those "in the business." I am disgusted that our elected "leaders" would waste such money, time and effort to draft this knowing it can't stand up under scrutiny while also knowing full well there are other things which can make an actual difference in our community. as a paramedic I am entirely aware of what things actually harm our community and for those that haven't figured it out yet, its not FFL's and its not law abiding citizens. to those who worked for this bill, you should be ashamed. if I had time in my busy day I would come to tell you that to your face. your efforts are wasted abridging my rights and for what, a piece of paper that says you tried. throw this bill away, leave the second amendment alone. you owe your constituents more. do better.
