

Submitter: Joshua Yoder
On Behalf Of:
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3076

This is very misleading as the original text and idea was to study a state gun dealer licensing program, whereas this bill seeks to implement one.

HB3076 is an attempt to ruin businesses in Oregon, and to shut down gun dealers in an effort to enact additional layers of gun control. The idea here is to make being a gun dealer so prohibitive that nobody wants to do it. This is an outrage! This 2025 legislative session, armed with a super majority is doing nothing more than catering to sex offenders and allowing corruption to run rampant while trampling over the rights of Oregonians.

I call upon all Republicans in the state legislature to deny quorum and stop these bills from moving. As a citizen of this state, and effectively your employer, I for one authorize your absence.

We must NOT allow our protected rights to be trampled on, and that's what HB3076 does. It's a second layer to banning all firearms in Oregon. Between HB3075, HB3076, and several other pending bills, there would be nothing left on a state level of our right to (acquire) keep, and bear arms.

The federal government already has more than enough oversight on gun dealers. We don't need more regulations! If there's anything that needs fixing, it's the criminal prosecution across the state! We can't even go to Wal-Mart or other stores for basic supplies without having to get an associate to get them from a locked case, then make a micro purchase in whatever department because of rampant unprosecuted theft. Our prices are skyrocketing because of this too. Our mental health system is broken, catering to those with mental health problems, normalizing it instead of making anyone get help and have accountability for their actions. Our children have more control over their mental health than parents. These are the issues that actually need fixing.

If you want actual public safety, fix our broken mental health system. Stop pandering to the mentally ill!

Enacting gun control under the guise of public safety is interest balancing which is prohibited under *NYSRPA v Bruen*, and this state is trying to circumvent that. Furthermore the DHHS has just REVOKED the definition of 'gun violence' being under a public health crisis. We will not stand for our rights being eroded away like the Germans had happen in Nazi Germany! Our right to bear arms is PROTECTED under the SECOND AMENDMENT of the US CONSTITUTION from GOVERNMENT

INFRINGEMENTS! "...Shall NOT be infringed" is very clear. The second amendment does NOT grant us a right, it protects it from tyranny, like is occurring on the STATE level here right now. Attempting to circumvent these protections by calling it ok under state law doesn't change the fact you're violating federal law.

I urge you, I implore you, OPPOSE HB3076 and all other unconstitutional gun control guised as public safety! Stop wasting our time and money working against the people!
