

Submitter: Andrew Allen

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB2960

I strongly oppose any and all forms of plastic "recycling", which is a filthy process that fails to meet its main objective of effectively recycling the target material.

Plastic, despite industry claims to the contrary, is not a recyclable material.

Permits for such endeavors should be denied, and no state financial aid should be provided.

Thanks very much.
