

Submitter: Rachael Anderson

On Behalf Of:

Committee: Senate Committee On Early Childhood and
Behavioral Health

Measure, Appointment or Topic: SB1167

As a mother myself, an active local birthworker, a birth and postpartum doula, a childcare worker and professional career nanny for many various families all over America for over 18 years... I beg you to please consider our children in Oregon and their futures! For our children's children, our country, and the world, please support the development of successful children immediately in Oregon state! Please continue to fine tune any and all areas as need within this bill, once this bill has past. Thank you from the bottom of a mother's heart and now a grown child's heart that didn't receive the support and care that was so desperately needed and wanted while in adolescents.
