

Submitter: G Baty
On Behalf Of:
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3076

Representatives Kropf, Chotzen, Wallen and distinguished members of the committee.

Gun dealers are highly regulated at the federal level and subject to unannounced compliance inspections by the Federal Bureau of Alcohol Tobacco and Firearms (BATF). These inspections look for violations of Federal, State, and Local Laws.

I vehemently oppose this waste of legislative effort and associated financial implications of measure HB3076. Any meaningful study will cost at least seven digits to bring experts to the table.

There is nothing this study or resulting legislative recommendations can do to improve public safety.

Any resulting legislation from this study will likely run afoul of article VI clause 2 of the US constitution.

Thank you for your consideration.
