

Submitter: Dave Watson

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

Due to political popular consensus to over regulate any and all things having to do with the 2nd amendment and firearms. This bill might be plausible in high crime areas in the bigger cities where evidence may be obtained and confirmed to be a life threatening or dangerous ongoing situation but to try to apply this to everyone and everywhere in the state of Oregon is very one sided and would likely have devastating effects on smaller entities. Also it is not fair for smaller low crime rate areas and entities to be held accountable for the bigger higher crime rate areas.
