Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB1120

Let's keep it simple.

Our prison systems are an artifact from the 16th century.

Society obviously requires methods of intervention when individuals act in a damaging manner that is far outside normal bounds of accepted behavior.

But, let's do everything we can to see that interventions done in our name are humane, fact based and outcome reviewed.

I support 1120.
