Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

This is my written testimony opposing hb3076. Upon reading the bill it seems that it aims at putting in effect redundant, needless, and overcomplicated means of firearm sales and transfers in the once free state of Oregon. The ATF already oversees and deals with this, and to add onto their job will only add confusion and mistakes. This will obviously do nothing to stop crime or illegal transfers as criminals are experts at circumventing the law. No person looking to help lawful gun owners and potential gun owners would see this as helpful. A plain way to translate this bill is an added wait time to garner more fees and line politicians pockets who oppose our natural born rights to own, purchase, and sell firearms.
