Shervin Sardari-Kermani

On Behalf Of:

Committee:

Senate Committee On Judiciary

Measure, Appointment or Topic:

SB696

Firearms do not need any of these “rapid fire activators” to operate at a faster rate of fire: One achieve this by simply bump firing the weapon and all that is required is a semi-automatic weapon and your hands. “rapid fire activators” were made for and have been used by passionate gun owners and hobbyists as a way to maximize and enjoy their weapons fire ability and not by criminals to commit crimes. This measure does nothing in favor of anyone! It will not stop criminals from possessing them and it will not prevent crimes. It is my fear that this Bill if passed would make law abiding citizens with a passion for guns into criminals for no other reason than the self-interest of the bill’s sponsors and so they can feel a little bit better about a matter that has little to no impact on public safety.
