

Submitter: Neil Baird

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

This is simply a move to put a legal business out of business and to further erode our 2nd amendment rights. This bill must be rejected.

This bill does nothing to prevent crime, it is only intended to further an agenda while targeting small businesses throughout the state. Quit wasting tax dollars by tilting at these windmills.

In the attempt to destroy federally constitutional amendments 2, 4,9,10, 14, the Oregon state legislators proposing this bill fully intend to further restrict the legal sales of guns to citizens. There are already laws on the books since 1968, if simply followed, would have stopped all shootings, assassination attempts, and school shootings then. But they haven't been followed. This leaves removing all guns of 'concern' and restricted magazines, the 'must be locked up when not in use' law (!) and the FFL laws. Now, this will hamstring FFL sellers from selling legal guns even more, hindering their profits and business. If this passes, the likelihood will be, next year another 10 bills, including FFL, then the next, more bills, until finally, the state of Oregon will have stripped the citizens of all rights to carry or sell guns or be labeled a criminal.
