

Submitter: Marie Morel-Seytoux

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB2960

My name is Marie Morel-Seytoux, and I'm a member of Climate Reality Project Portland Chapter who cares about climate solutions, climate justice, the health of our environment, having a healthy world for my children and grandchildren writing to ask you to support HB 2960 which will protect human and environmental health by prohibiting the establishment or operation of harmful plastic conversion facilities in the state.

Plastic conversion technologies such as pyrolysis and gasification are both polluting and energy intensive— they pretend to be solutions while likely reinforcing rather than diminishing our reliance on fossil fuels.

Please protect Oregonians health and futures. Support HB 2960.

Thank you for the opportunity to comment.
