Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

This is NOT constitutional in any way. This is only infringing on our God given rights as citizens in this great United States. This will not stop criminals(as literally nothing has) and will only effect law abiding citizens. The laws we have in place right now are sufficient enough, and we do not need more government or more law's in any way shape or form. The state of Oregon's government is full of ignorant people that only care about power and money, and will stop at nothing to get it.
