Senate Committee On Rules

Measure, Appointment or Topic:

SJR28

I strongly support OCERA. Our planetary ecosystem sustains human and non-human life for our current and future generations, and its protection should be embedded in our social contract-i.e. Constitution. The Amendment will increase the probability of a healthy and secure environment and life support system for all of our children, grandchildren, and the larger ecosystem of which we are a part. Thank you for voting for OCERA.
