Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

This bill literally adds additional taxes/ fees for no good reason other than to push an agenda or to blister some @ general fund” without oversight or accountability.

My father had a gun store in Estacada previously and I allready know well the amount of fees, licensing and permits involved.

The additional ATF requirements, alarm codes on file and the building layout, inventory and records requirements.

This only does those things again, in addition to- adding extra fees and taxes above and beyond that for no good business or safety reason.

It will incur an increased desire for street guns and black market problems, as it puts common firearms out of reach for many single moms, those on fixed incomes and senior or dependent family’s all-ready struggling.

Now, you want to add to that without any plan or action to actually make our streets safer, police criminals or even enforce decades of current laws.

This does nothing new but strain business, make an elete class or well off more likely to be able to afford;

A constitutional right.
