

Submitter: Jett Gindlesperger

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

I oppose this measure because it will just cost more time and money for those who need protection in dangerous areas. The people these measures truly harm are going to be the law abiding people who may not have the strength to defend themselves such as the elderly or single mothers. Someone's son or daughter could be coming home from work, worrying about if they're going to be assaulted in the parking lot in a shady neighborhood and how they are going to protect themselves from these criminals, who have no regard for any gun laws. This measure truly needs to be reconsidered because it really only negatively impacts the good people of Oregon.
