HB3076

I am submitting my testimony in opposition to HB3076-1 and its suggestive nature of eliminating all FFL's in the state of Oregon. This bill has unreasonable requirements that make it impossible for an already federally regulated license to be operated in our great state. There are issues of concern with the legality and restrictions to the Federal and State Amendments we have in place. This bill is an extension that does not need to be in place and has no merit on the presumed issue of guns in the wrong hands statements. FFL's already go through the correct legal process to obtain federal regulations and are held to a higher legal standard. This bill does nothing more than obtain a higher goal of a "no gun state" which opposes the basis of the 2nd Amendment to defend ourselves from foreign and domestic enemies.
