HB2583

Virtual charter students deserve fair access to the same resources as every other public school student. My children chose to stay with a virtual charter school after Covid because it worked beautifully for their learning needs, but they are unfairly excluded from crucial Student Success Act funding. HB 2583 fixes this by providing equal access to resources while ensuring funds stay in Oregon's community-run schools. All students MUST be supported fairly! Charter schools provide the same education as a brick and mortar but charter schools are more tailored to the child's individual needs. So many children thrive educational with charter schools. My children have thrived massively in all subjects in their charter school. I fully support HB 2583.
