

Submitter: Kevin Dial
On Behalf Of: Oregon National Guard Association
Committee: House Committee On Behavioral Health and Health Care
Measure, Appointment or Topic: HB3572

Emergency Medicament Service providers are incredibly valuable and difficult to fill, as trained medical personnel are in high demand across the nation. By utilizing the training military personnel gain while in the service, you will give these individuals more than a jump start to fill these critical shortages. Many of these military medical personnel have years of real world and combat experience that far exceeds the written training shown on their resume. Thank you for reviewing this issue and helping Oregon gain the emergency medical predestination we need by supporting HB3572.
