SJR1

There are too many seniors being priced out of their homes even long-term homes because of the rising property taxes. They spent their life paying off a mortgage but cannot in their retirement years afford the taxes. And it's even worse if they still have a mortgage as a senior. It should not be the case that they have to move into a low-rent apartment and only the rich can afford home in their retirement. There are also not enough apartments to go around so please allow seniors to remain in their home.
