Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

I would like to draft this correspondence in opposition to this bill. As a local gunsmith for Columbia County, I have invested time, education, and a significant financial investment to provide services to resident's firearms to ensure they are in safe and working order. Already possessing a federal firearms license, I find this bill a further intrusion into second amendment rights, a burden on small local business, and will prove to be a financial hardship to small business helping provide a service to the community in keeping firearms in a safe and functional matter. This industry is under enough licensing and regulation and any financial burden past on to a consumer will reduce opportunity for a citizen to keep their firearm under proper repair.
