

Submitter: Philip Lew

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

My name is Philip Lew of Corvallis OR and I strongly oppose measure SB301 because it will roll back crucial protections for the Newberg pool area of the Willamette River. Public safety, bank erosion and other environmental considerations make it mandatory to limit large watercraft so that all users can enjoy the river without disruption. Fish habitat is another important consideration. Please vote no on SB301 and the amendment that is deleterious to the river ecosystem and its enjoyment by all users.
