

To: Senate Committee on Natural Resources and Wildlife

SB1131

Mar 22, 2025

I urge support for SB1131 to award a grant to the Chintimini Wildlife Center that rehabilitates wildlife. I have been providing support to them annually after they accepted injured animals that we have found. Their heart is in the work and they provide learning events to train people on how to interact with wildlife. We have more environmental events including wildfires and habitat destruction by building into forests that have greatly increased the need to help impacted wildlife. Chintimini does not have enough resources to meet the needs of the animals in our large natural areas that surround our communities. They are worthy of this action.

Sincerely,

Dr. Beverly E. Law

Emeritus Professor of Global Change Biology
