

Submitter: Lynn Norris

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

For many years scientists have studied Beaver and documented the benefits to the landscape by creating wetlands. Bringing water to places that have dried up due to many factors, including climate change.

Information about ecosystems and connection with mammals and plants to specific landscapes is indisputable.

Please pass this bill knowing the vital importance of water and the Beaver who enable the restoration of streams and wetlands.

Thank you
