Measure, Appointment or Topic: HB3076

I oppose this bill, we have no funding for the policies you are trying to already implement. Our state's far reaching of our gun rights have had no help on stopping any gun violence in our state or any other. Oregon's law makers already can't budget to keep schools performing at optimal performance, or our policing/investigating up to performing where detectives can do their jobs, where our jails and justice system can follow through with the legal system to keep true criminals to even make it to their court appearance. Look at Multnomah County for instance, the legal system is so backed up, they can't get criminals to show up for their court dates because it's a catch and release system, thus having many criminals walk free. This is straining on the victim and costing extreme tax dollars. Putting more checks and balances into a system already stretched too thin is not going to improve the system until you restructure your current system. Oregon needs to stop the obscene overreach, follow through with keeping drugs and criminals off the streets and fix Oregon's insanely broke spending habits. Guns and gun stores are not the issue! That is like saying the fentanyl issue killing our citizens is all coming from the locally owned pharmacies and all pharmacies should have extra regulations & inspections to ensure they are doing their jobs properly. Oregon's system is a broken one, but it doesn't start with our gun dealers or stores that sell guns to law abiding citizens, it starts with refiguring our budget system, our full judicial system, cracking down on people who are repeat offenders, healing our broken school systems. We have plenty of regulations on guns and drugs, neither of which Oregon's judicial system can even handle with the broken system.
