

Submitter: Nicholas Flory  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure, Appointment or Topic: HB3076

I worked in retail firearms sales, I am a military veteran and participated in professional firearm competitions. This bill is unreasonable and unconstitutional. The ask of retail shops to abide by those unnecessary regulations will bankrupt or put most small shops out of business. This measure does nothing to prevent criminals from obtaining illegal firearms, and only hinders law abiding gun shop owners and their customers. The State should focus on more pressing issues such as our fentanyl EMERGENCY that kills many more than firearms that only account for 1.5% of deaths in the state. My tax money and my fellow citizens should be better spent than fighting an issue that already has numerous federal regulations. This bill along with HB114 is plagued with years of state money fighting legal litigation and will cost taxpayers millions of dollars, not even mentioning barring us from our right to bear arms.

I welcome the state to have me as a professional witness for any further discussion and questions with someone that worked and has experience in this industry, I will go on a whim and say none of the individuals that proposed this bill have that experience.

Thank you,

Nicholas J Flory
