

Submitter: Stephenie West

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

This bill is unconstitutional, and would be a repeat of tragic history.

The inability to protect oneself from infringement of any sort, is the reason slavery even began and stayed in place decades ago. If this is passed, you will create desperation in good people. You create criminals by forcing law abiding citizens to become unabiding (simply because they are trying to protect themselves when it is proven, there won't be protection for them in time). I live in a community where there is ONLY two officers on duty for only maximum 12 hours a day. There is no one to help us when a criminal comes when the police are off duty. This bill only further hurts our community. To pass this you are attacking my community.

Furthermore with this being an impossible ask of our nation that has known and been founded on the right to bare arms, to protect us against oppression , you create potential for civil war, ultimately making us vulnerable for world war. It is easiest for the enemy to attack us if we are fighting amongst ourselves to pass, this is to guarantee World War III

Do not disarm law abiding citizens, so that they can be further raped and pillage by criminal otherwise you're nothing but a criminal yourself.

Do not be the reason myself or my children face oppression.

Stephanie West
