

Submitter: Marianna Iverson

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I am writing in support of HB3932. As a almost life long Oregonian I am in full support of making our water ways more in alignment with how nature intended. Beaver activity is vital to our water system and to the continued abundance of our lands. We need to take action to create ways of living with an interacting with nature that is in cooperation with the living creatures on this land who create waterways that are erosion proof, carbon sinking, and help to support groundwater. Please pass HB3932, for all of us and for future generations who will be dealing with the effects of increased climate change. Thank you
