Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

I fully support the closing of beaver trapping in Oregon. Beavers are only beneficial to our environments and trapping and killing them only hurts the environment. I work with ONDA for creating better streams that help the flow of rivers and creeks in Eastern Oregon and I also help document the process and I've seen nothing but success from it. In order for these streams to grow and stay healthy, it takes Beavers to do that. Kill the beavers. Kill the flow of water.
