

Submitter: Robert and Deborah Stumpf  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure, Appointment or Topic: HB3076

We are opposed to HB 3076 for several reasons. We are most concerned about the potentially dangerous situation this would create for Oregon. The unnecessary, and extremely redundant procedures and costs will likely put many out of business. We worry this will create a supply-and-demand issue, similar to what happened during prohibition. Black market activity will increase. This places a tremendous, undue burden on our FFLs as the unknown costs involved. Oregonians are already heavily taxed, and it's not getting easier. The cost of living here is getting more difficult daily, especially for lower-income people and people on fixed income such as retirees who have given and worked a lifetime providing revenue for Oregon. Additionally, after reading this, correct us if we are wrong, but it sounds like the State of Oregon wants to create a firearms registry, which is definitely unconstitutional. Please consider THAT this House Bill 3076 is unconstitutional to both FFLs and law-abiding citizens of Oregon. Again guns are not the problem, mental health is.  
Thank you for considering our testimony. Robert and Deborah Stumpf
