

Submitter: Taunia Green

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SJR28

Dear Oregon Senate Rules Committee,

Thank you for the time and energy you take to listen and read these testimonies.

I urge you to vote yes on SJR 28-1 Right to Healthy Environment Constitutional Amendment.

As a human, the only way I, and the rest of us can stay alive and thrive, is with clean water, air, soil, food. This legislation will prevent poisonous, air and soil, avoiding dangerous toxins into our environment so we all can stay healthy, alive and thrive. It will also prevent millions of \$ in clean-up. I want this for you, I want this for me, I want this for our loved ones and the world.

If we (your constituents) and you take this action we will be protected from any federal regulations/deregulations threatening our country's health: your loved ones, your children, my loved ones and children... Let's work together for a future we can be proud of, because removing toxins from our environment and therefore our bodies means we are still alive and thriving for now and continued generations.

Deep Gratitude  
Taunia Green
