Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3076

I understand the concern of illegal guns in the streets and wanting to crack down on that. However if those backing this HB were actually serious about this issue, they would be spend their time and money on law enforcement getting these illegal firearms off the streets, not imposing further complications on Oregon business owners. Oregon business owners have already moved or closed doors because of Oregon policies. Imposing more will make this situation worse. Look at California, their poor policy and lack of strong/fair government and regulation is making people flee from that forsaken state. Ultimately to the point when they are lousing seats as of the last election. If someone is making a mistake, you don't mirror it thinking you will get a different result. Oregon is on a path to be just like California. You are losing trust from your citizenry and people will start picking their bags and moving to states who are more neutral. It is okay to not agree with one another. However, forcing businesses to pay by the sale is a great way to get rid of businesses and the people they employ. Think of it this way. A drunk driver crashes their car and kills 3 people. Instead of punishing the individual not following the law, we would impose a law forcing dealerships to apply for a license that they are charged more by the vehicle they sell. This is nonsensical and a recipe for people to start fleeing this state, just like California is seeing. Get outside of your echo chamber and listen to all the people your supposed to be serving. Not just those closest to you.
