Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3076

I oppose HB#3076. This is just further over reach of the government and henders our 2nd amendment rights. FFLs already have to go through stringent process to hold their FFL and operate as a business able to sell guns along with hold business license in the State of Oregon, federal firearm license and insurance. Adding additional costs to a company that already has a low profit margin would do nothing but eliminate these business, which I believe is absolutely the intended goal. When you limit companies that provide a product to people then the supply and demand become and issue and people often turn to other measures to obtain what they want. This could potentially backfire and just end up with more unregistered guns out there. We are already also heavily taxed, this would just increase prices to the public also causing financial burdens on lower income citizens.

Democrats have done nothing to try and actually solve problems with criminals having guns but only penalize law abiding citizens. We are tired of it. They need to do their job and actually look at the issues of mental illness not being addressed, criminals not being help accountable for their crimes rather than punish those of us who follow the law. There has been no financial statement even provided so the fiscal and revenue impact isn't even know. Lastly, this would result with a state registry which is unconstitutional. I urge you to oppose HB#3076.
