

Submitter: Terri Wanke

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3932

I support Bill 3932. Scientific facts show that beavers contribute to the health of our waterways. Without interference by humans, nature (which we are part of), knows how to take care of itself. Please allow nature and beavers to do the work they are meant to do.
