

Submitter: Dale Blankenship

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

This bill is unconstitutional and would make firearms nearly impossible to get for law abiding citizens for self defense. Multiple small FFL's could not afford to stay in business and if they did they would have to pass the increase onto the consumer that is already overburdened in this economy. Guns would then be a luxury that only the rich could afford, which would put firearms purchased for self defense out of reach of the people with low income that live low income areas where crime is at an all time high. Law enforcement is not as readily available in areas outside of Portland, Salem, and Eugene with response times of over 2 hours depending on the weather and location of the emergency. Thank you for your time and consideration of my opposition to HB3076
