

Submitter: Cynthia Murdoch

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

As a tax payer in Oregon, I am so tired of the enormous waste of money & time better spent on issues that need solving. The firearms issue is already taken care of with the 2nd amendment. There is no need to waste time studying the ways the State government can charge fees or try & remove our right to carry any firearm in any condition with any accessories.

It is commonsense to understand the FACT that has been proven in States, that when you restrict gun ownership it is both unconstitutional but also leads to higher crime rates. The State of Oregon government who are suppose to represent the people of Oregon, are way out of their lane & they need to cease this foolish attempt to regulate that which is a Right per the Constitution. Not including Fiscal Statements; not including all the details; leaving huge gaps in interpretation in how these Bills are managed & not having any support to run these many programs that are quickly being shoved through are simply unnecessary & a waste of tax payer dollars.
