On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB3932

While I recognize this bill likely affects private properties and I recognize this might burden property owners, the waters that flow through private properties are a public resource. The benefits that accrue from beavers on the landscape are well documented, and yes, they can also create problems. However, there are effective non-lethal ways to minimize potential beaver damage. I believe the benefits of HB 3932 outweigh the burdens and this bill should be passed.
