Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB3932

Please support HB 3932 to allow beavers to do all the good work they do for healthy watersheds. I am a farm owner. Our family farm includes a large wildlife habitat area managed through ODFW's wildlife conservation program. We encourage beavers in order to help restore habitat, reduce invasive plants, and help both water quality and quantity. Their dams help manage low summer flows by storing water naturally. I hope we do more to encourage beavers on private lands as well! Thank you.
