

Submitter: Debbie Spresser

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3932

Please protect Oregon's beavers on public lands by voting for HB 3932. Beaver-created infrastructure provides valuable ecological services including habitat for native plant and wildlife species, increased water quality and flood control. Beavers are being reintroduced at many wetland restoration sites precisely because of the efficiency and efficacy of their work.
