

Submitter: Donna Bonetti

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I support protecting our waterways and beavers by allowing beavers to do the environmental services they provide to water systems and ecosystems. Rather than listing all the services they do when left in place I have decided to share some more comprehensive information including videos of the good work beavers do when left in place. <https://environmentamerica.org/articles/beavers-are-ecosystem-engineers-and-fight-climate-change-too/#:~:text=Beavers%20help%20control%20water%20flow.&text=Dams%20physical ly%20store%20water%20on,place%20thanks%20to%20their%20dams>. Thank you for checking out this information.
