Senate Committee On Rules

Measure, Appointment or Topic:

SJR28

I support SJR 28. We need this resolution to show Oregon's commitment to a clean, healthy environment isn't just lip service. We need it to keep outside interests from plundering our state because they've stripped everything precious and beautiful from theirs, or so that they can avoid plundering their own state. We need it to support our ability to keep other countries from using our resources for their own gain, like when the Pacific Connector Pipeline tried to bring natural gas through our state for Canadian and out-of-state profit, offering a few crumbs for us in the form of a little bit of gas for domestic use, and a few payments to counties.
