

Submitter: Cat O'Connor

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I Would like to support HB-3932. Beavers play such an essential role in maintaining healthy waterways in Oregon. By building their dams they help slow water flow and filter pollutants , improve water quality and create habitats for other wildlife. By supporting HB 3932 we are recognizing their ecological importance Beavers are ecosystem engineers

that create numerous benefits. We need to recognize the value of the beavers and ensure their continued presence in our ecosystem and protect our waterways for future generations.

Thank you
