Environment

Measure, Appointment or
Topic: HB3932

Fish and Wildlife,

I would like to see all streams, creeks, and waterways be allowed to go back toward a natural state. Once that is attained, then consider the possibility of some form of animal control. Mother Nature knows what worked in the past and could show us once again what is in the planet's interest because it is obvious we are not paying attention. It can be that simple!

Evolving in Love,
Douglas
