On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Thank you for considering this common sense bill to help restore critical habitat for fish, wildlife and yes, even cattle. I worked as a flood irrigator for McAuliffe Ranches Inc. in Fort Klamath for 13 years to put myself through a bachelors and masters at SOSOC. I have seen first hand how beavers can raise water tables and retain water through the driest part of the season. Promoting our state mammal's engineering skills is a win win.
