Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

I support protecting Oregon's beavers and streams. I've been a member and, with ONDA, plan to do restoration work next month. I understand that this bill effects impaired streams and work like this has been known to "fix" streams and return them to being more productive of water quality and quantity as well as fish. It dos not effect private lands and will expire after 6 consecutive years. Scientific research and literature has shown that beaver dam complexes and floodplains help to address four of these top five factors they are nature's solution, and they tackle these issues free of charge.
