On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3932

Please support HB 3932. Beavers are integral to a healthy environment. We need to do all we can to bring beavers back in full to the Beaver State. I have seen beavers in the wild only a few times and it was a deeply meaningful experience. I was inspired to learn more about their complex societies and importance to keeping our lands from turning into deserts.in this time of climate chaos, helping beavers do their work is of great importance.
