

Submitter: David Nilson

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB3932

I am submitting this testimony in support of this bill as I am an avid fisherman, hiker, and water quality enthusiast who is very concerned about the decline of water quality in Oregon. Beavers are a very important part of maintaining water quality, and there is no substantial reason that they should be trapped any longer. Please pass this important bill.

Thank you.

David Nilson
